

# PEST CONTROL POLICY

---

The Allen Park Housing Commission recognizes the importance of pest and vermin control in providing a living environment of adequate health and safety for its residents. To achieve this control the Housing Commission has adopted a pest control policy.

## PEST CONTROL AND EXTERMINATION

The Allen Park Housing Commission will make all efforts to provide a healthy and pest free environment for its residents. The Housing Commission will determine which, if any, pests infest its properties and will then provide the best possible treatment for the eradication of those pests.

The Housing Commission shall make sure that an adequate schedule for treatment is developed to address any existing infestation. Priority shall be given to treating cockroaches and bedbugs. The contract will include frequency and locations of treatment. Different contracts may be required for each property.

Resident cooperation with the pest control policy is essential. If necessary, all apartments in a building will be treated for the plan to be effective. Residents will be given information about the extermination program at the time of move-in.

Tenants must notify Executive Director immediately upon noticing any signs of bedbugs.
